

Scrum : Quality Matters

Harrisburg University Agile Summit
2016

"Bugs in your product are a symptom of bugs in your process -- if you focus on fire prevention, you'll reduce the need to fight fires"

Henrik Kniberg, Lean from the Trenches

What is Quality?

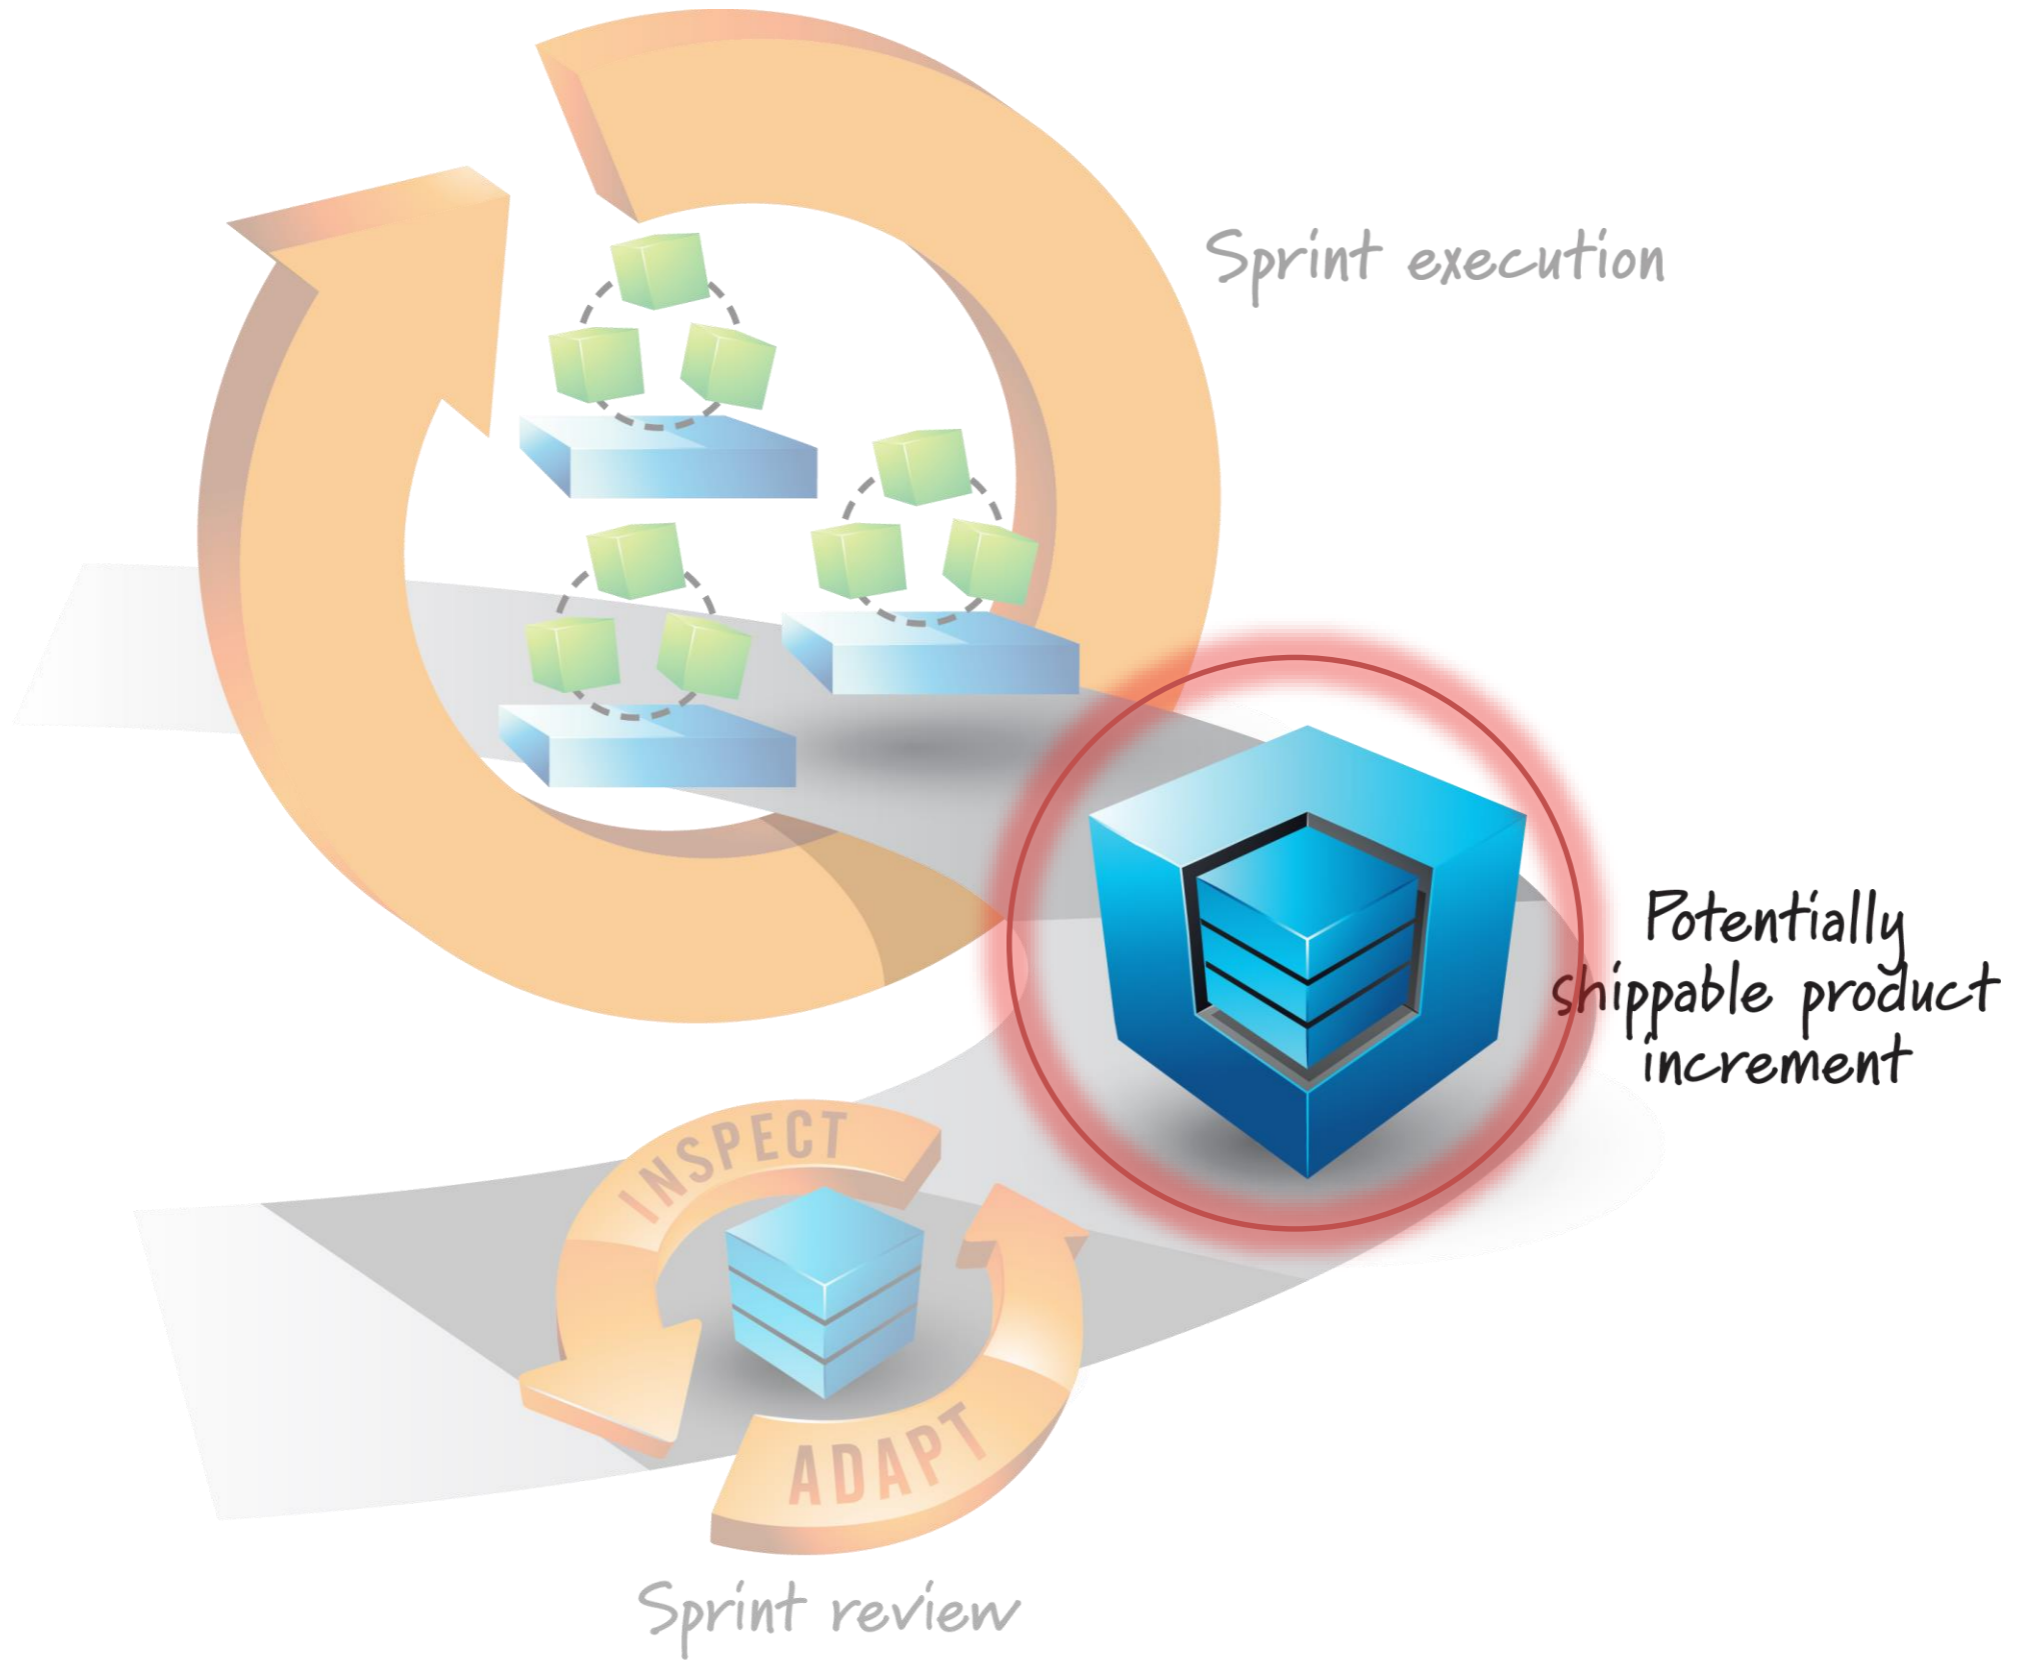

Cross-Functional Teams

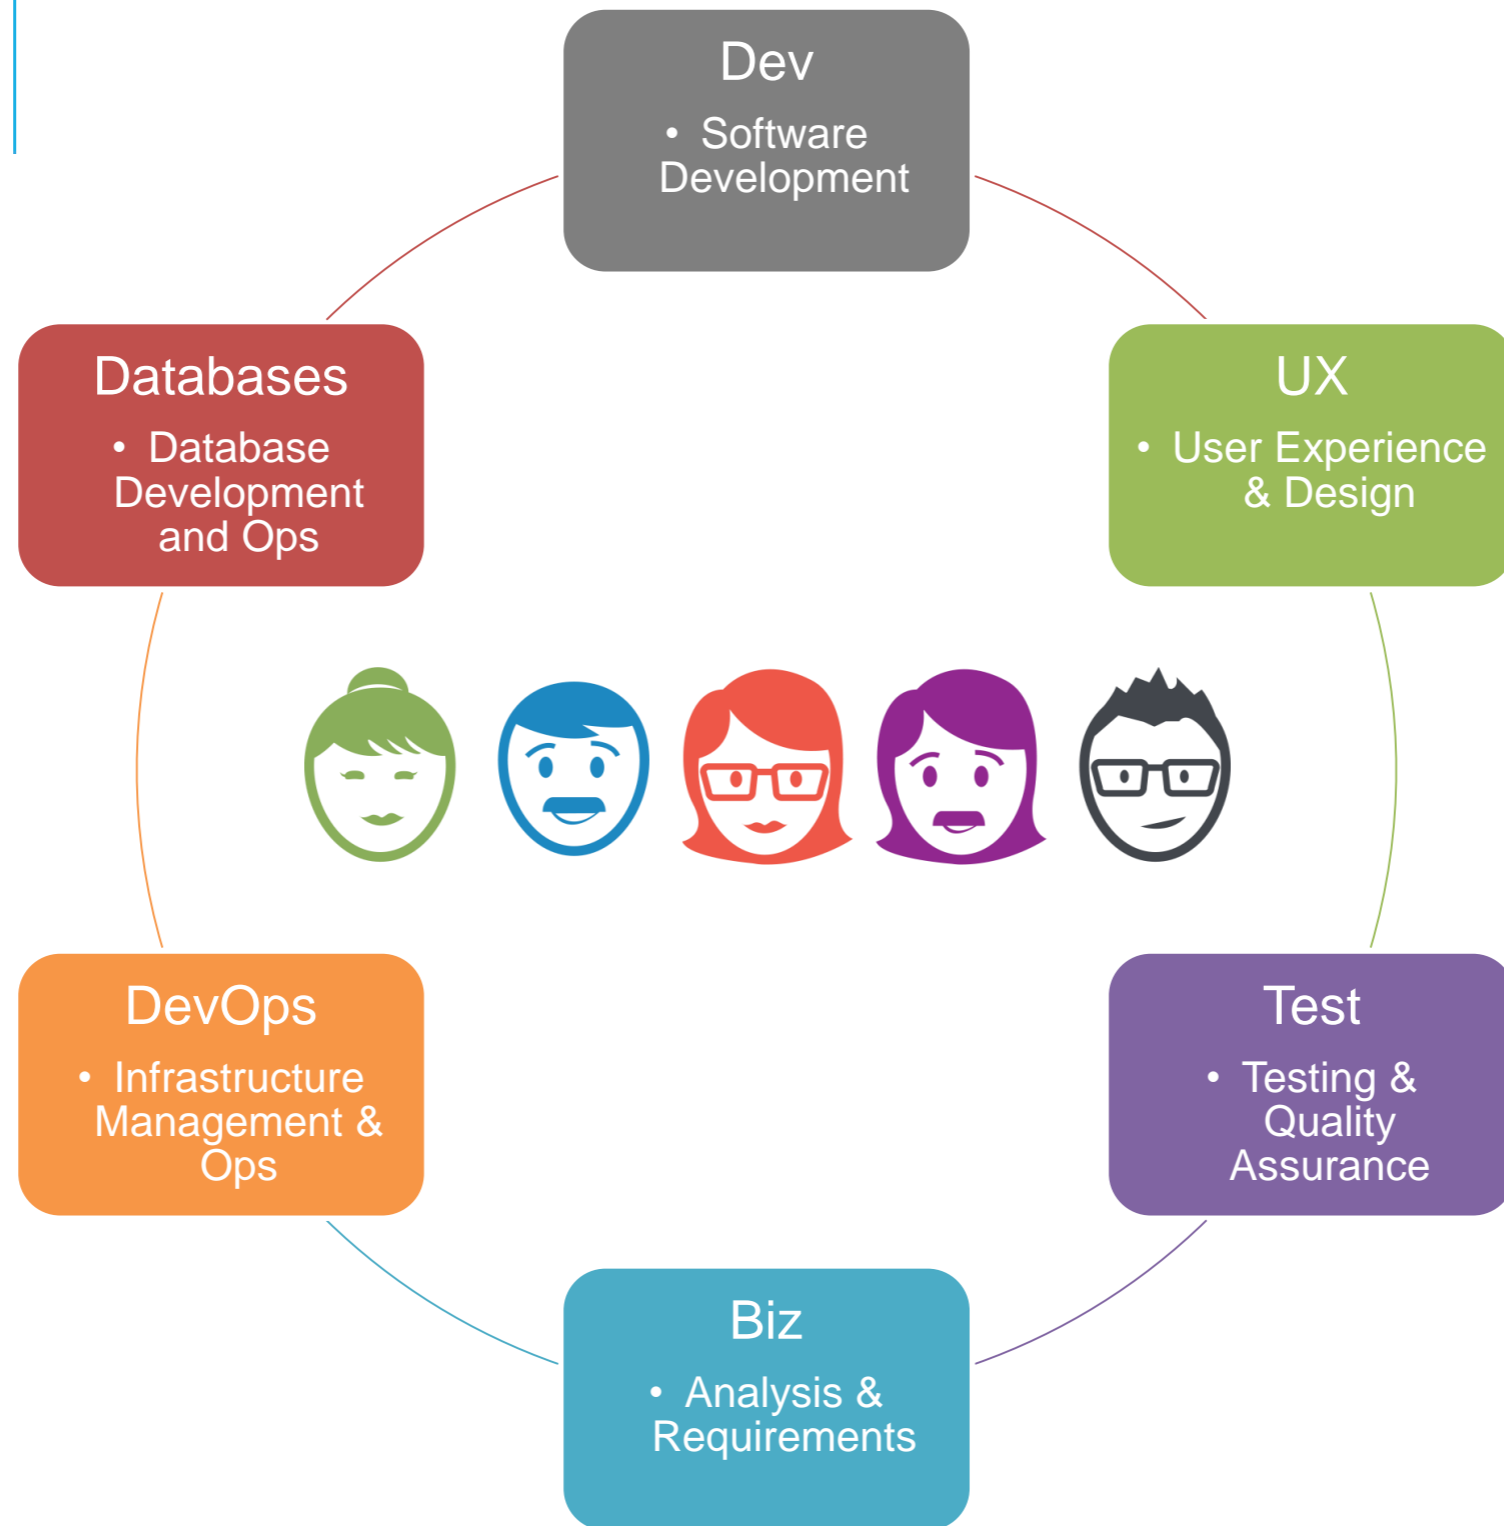

WHAT'S HOLDING YOU BACK?

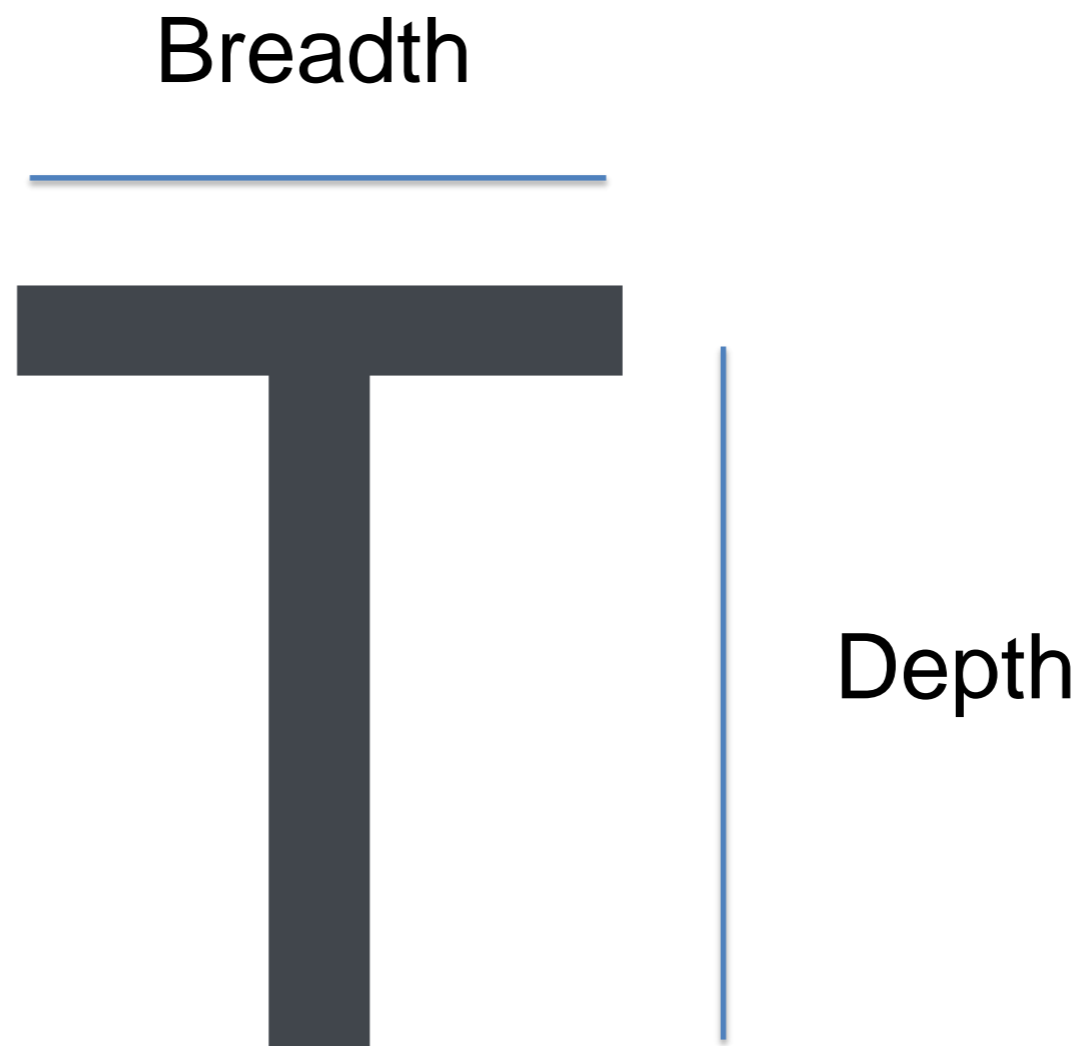

In Scrum, what is the primary reason for having a team that is cross-disciplinary?

Cross-Functional Team

T-Shaped Developer

Is an increment possible without a
Cross-Functional team?

Definition of Done

WHAT'S HOLDING YOU BACK?

What is the Definition of Done?

- ▶ Done - The state at which something (the increment) becomes releasable.
- ▶ Definition of Done
 - A simple checklist
 - Describes what “Done” means
 - Ensures transparency
 - Influences Sprint Planning
 - Helps to avoid “undone” work
- ▶ Example items on a DoD:
 - Automate Testing at the appropriate levels
 - The PO likes it
 - All acceptance criteria has been met
 - No known bugs
 - Code has been peer reviewed

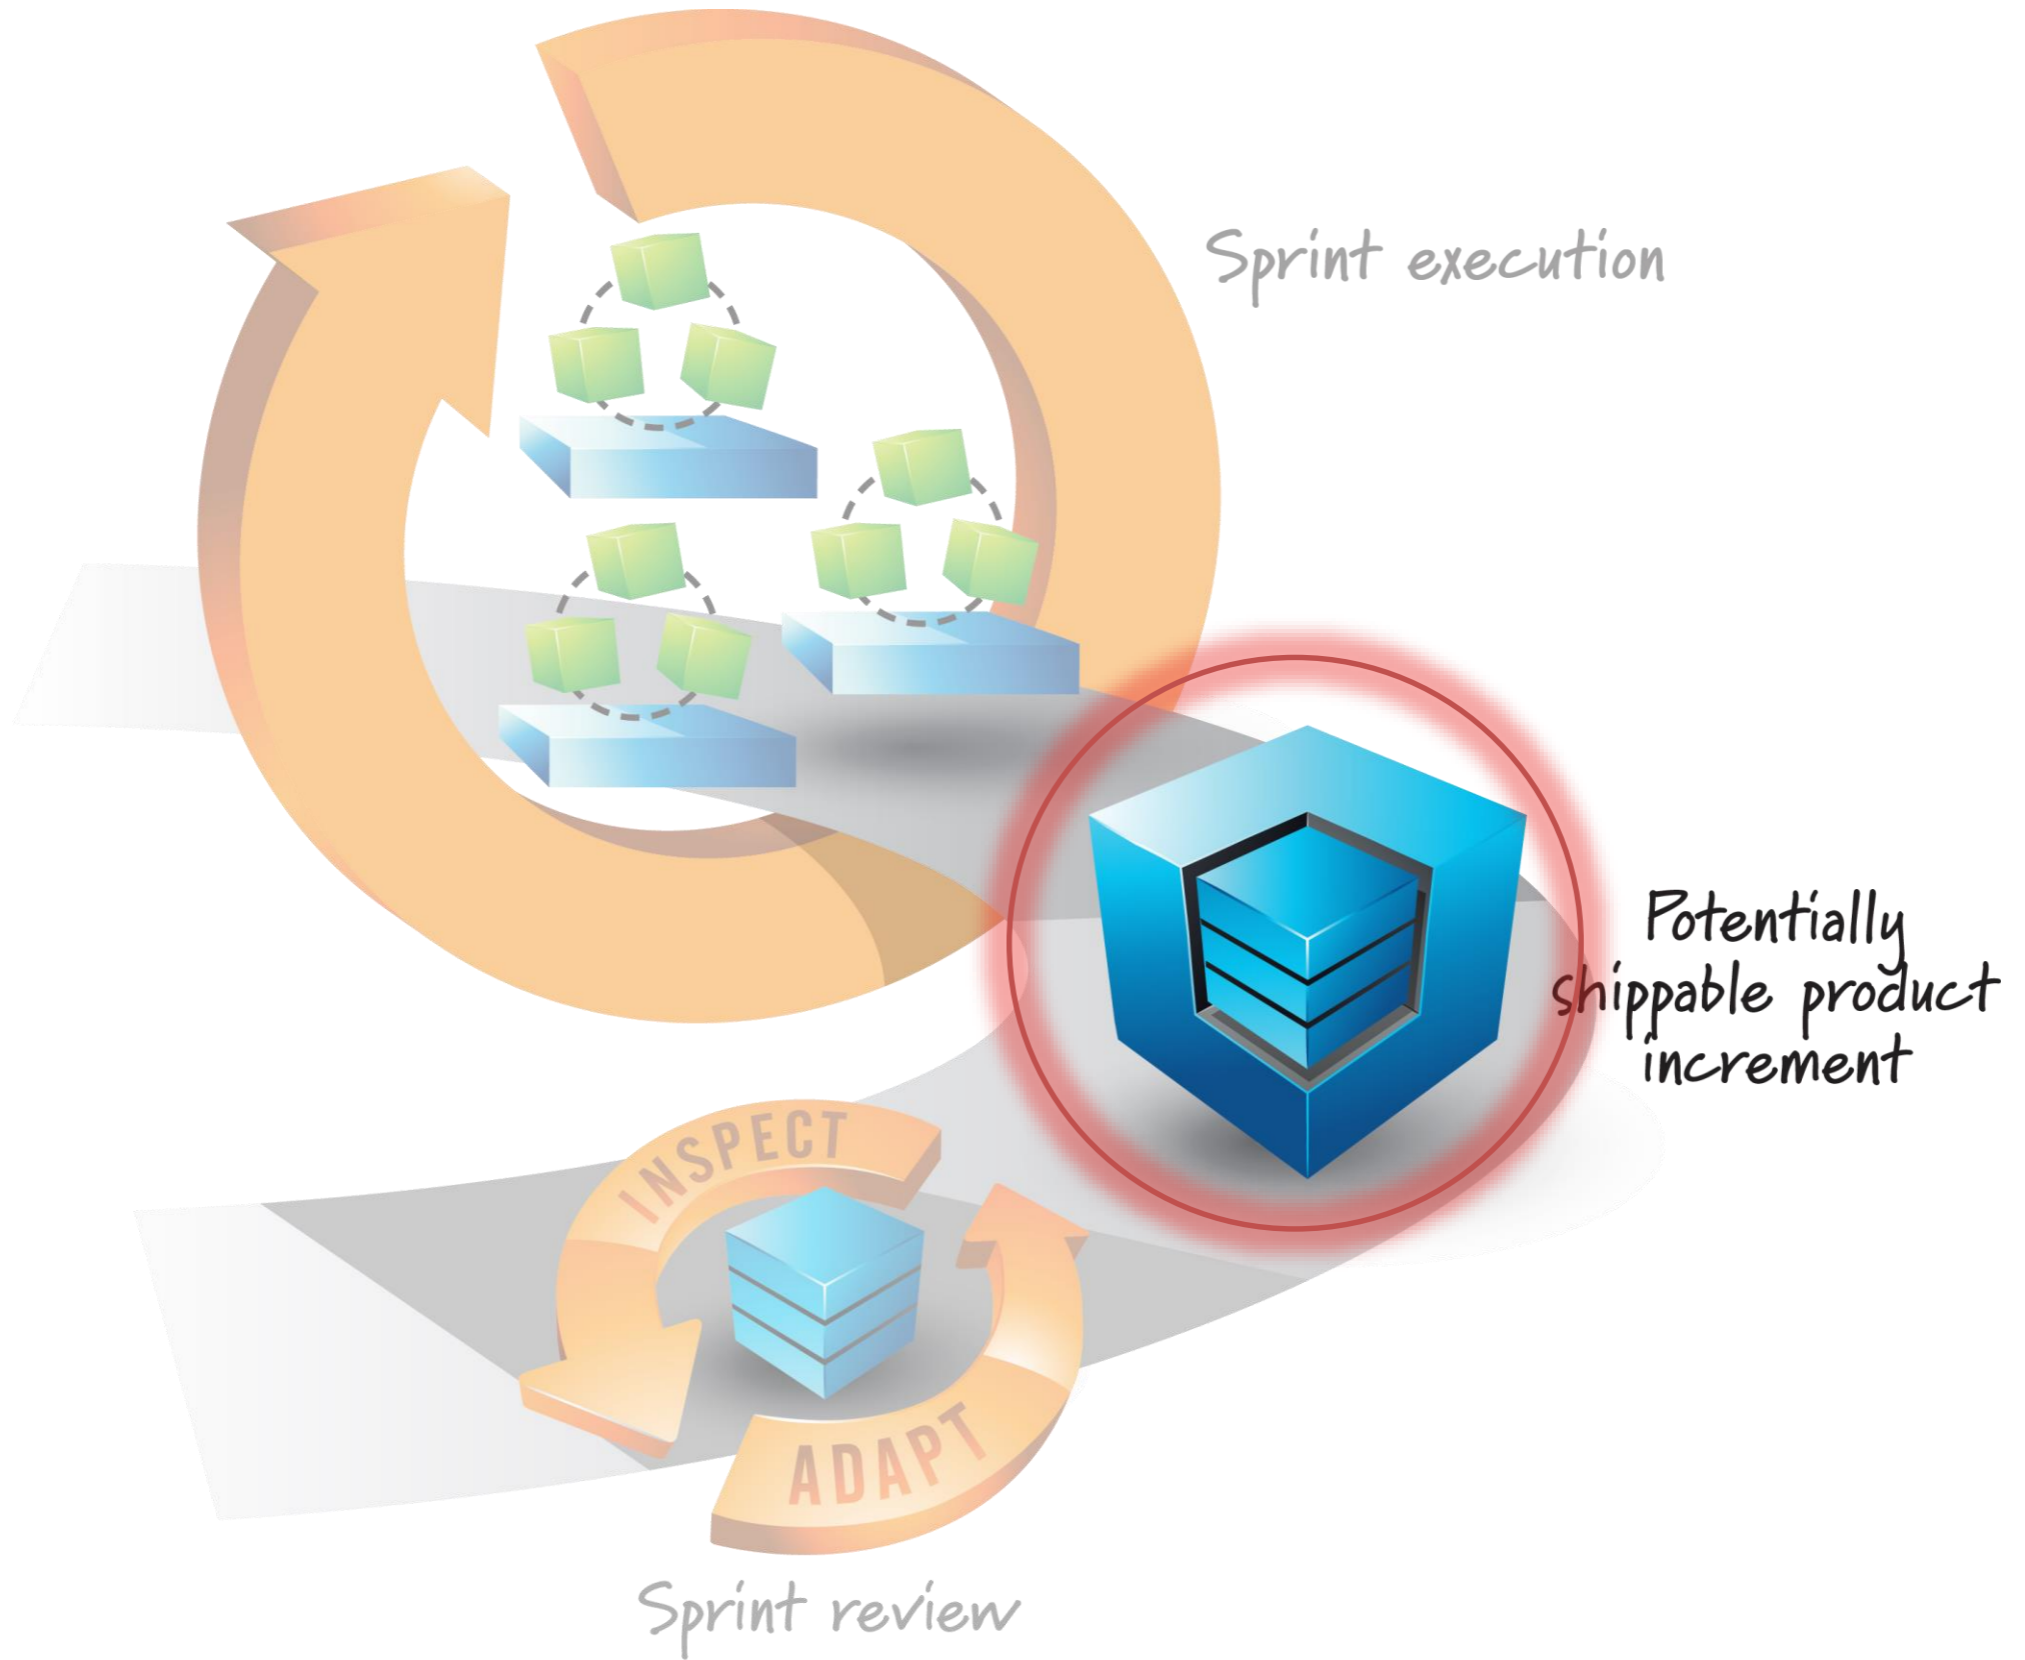

If we don't know what done is who defines what the definition of quality is?

Developer Feedback Loops

Empirical Process Control

- ▶ Empirical - Derived from or guided by experience
 - Inspection, Adaption, Transparency
- ▶ Scrum Events
 - Sprint
 - Sprint Planning
 - Daily Scrum
 - Sprint Review
 - Sprint Retrospective

Why is it important to increase feedback loops to developers?

Conclusion

WHAT'S HOLDING YOU BACK?
